

SAMEER SHENDE

Software Developer

Nagpur, Maharashtra | +91-8208886517 | sameer.shende154@gmail.com

PROFILE SUMMARY:

Full Stack Developer with 2+ years of experience building scalable web applications using Node.js, Express.js, and React.js. Skilled in designing RESTful APIs, database architecture, and high-performance backend services. Experienced in PostgreSQL, SQL optimization, and distributed systems with strong expertise in debugging production issues and writing maintainable code. Adept at collaborating with cross-functional teams to deliver robust and scalable applications.

SKILLS:

- Backend Development:** Node.js, Express.js, JavaScript (ES6+).
- Frontend Development:** React.js, HTML5, CSS3.
- API Development:** RESTful APIs, Microservices Architecture, Authentication & Authorization (JWT).
- Databases & Caching:** PostgreSQL, MySQL, MongoDB, Redis.
- Data Engineering:** Apache Nifi (Design & Maintain Flows), ETL Pipelines.
- DevOps & Tools:** Git, SonarQube, PM2, Docker, CI/CD Pipelines.
- Core Engineering Skills:** System Design, Performance Optimization, Debugging.

WORK EXPERIENCE:

Prevoyance IT Solutions Pvt. Ltd.

Software Developer | March, 2024 – Present

- Developed and maintained scalable backend services and RESTful APIs using Node.js and Express.js, supporting high-traffic applications.
- Designed and optimized PostgreSQL database schemas and SQL queries, improving query performance by 35%.
- Built responsive React.js components and integrated frontend with backend APIs, improving UI performance and user experience.
- Implemented authentication, RBAC authorization, and secure API practices to ensure application security and data protection.
- Improved system stability through logging, debugging, and performance optimization, reducing production issues by 20%.

PROJECTS:

Central Know Your Customer Records Registry | Jan 2026 – March 2026

- Developed CKYCRR Training and Helpdesk modules using Node.js, Express.js, React.js, and PostgreSQL for internal and partner use.
- Architected an AWS S3 video management system for secure streaming and content delivery to 1,000+ users.
- Integrated JIRA ITSM APIs into a custom Helpdesk module, increasing support response efficiency by 30%.
- Designed secure RESTful APIs to sync frontend and backend services within a scalable architecture.
- Optimized backend logic and PostgreSQL queries to ensure high-volume request reliability and performance.

Supporting Registry Management Portal – AgriStack | Jan 2025 – Dec 2025

- Built and optimized backend modules using Node.js and Express.js, handling user management, registry requests, and workflow automation.
- Developed secure RESTful APIs with JWT authentication and role-based access control (RBAC) to ensure secure access management.
- Designed and optimized PostgreSQL queries for large datasets, improving database performance and reducing response times by 30%.
- Integrated React.js frontend with backend services and implemented performance optimizations, significantly improving API response time and system reliability.

EDUCATION:

B.E in Computer Science & Engineering | 2019 – 2023

Rajiv Gandhi College of Engineering & Research
